

**Stars at Imaging World 2025:
Aftershow Concert with Felix Jaehn & Leony (a.o.)**

Imaging World 2025 (October 10–12, Messezentrum Nuremberg) will not only bring photography, video, and content creation to the exhibition halls – but also to the big stage: On Saturday evening, October 11, visitors can look forward to an exclusive aftershow concert featuring a stellar line-up. International chart-topper Felix Jaehn, rising star Leony, electronic talent AVAION, and newcomer D33MONE will ensure an unforgettable musical highlight that perfectly reflects the festival spirit of Imaging World.

“With the aftershow concert, we are creating a unique fusion of photography, content creation, and entertainment. Our goal is to make Imaging World a multi-sensory experience and set a highlight that will be remembered long after the event,” says Thilo Röhrig, Managing Director RINGFOTO.

Admission with Weekend Pass and wristband only

Access to the concert is exclusively reserved for holders of a Weekend Pass for the Imaging World. In addition, guests must pick up a wristband, which will be distributed at the Concert Counter (Entrance NCC West) and can be picked upon presentation of ticket as well as identification document during the following times:

- Friday, October 10th: 10:00 am – 6:00 pm
- Saturday, October 11th: 9:00 am – 4:00 pm

Important: The number of wristbands is limited and they will be attached directly on site. Collection on behalf of third parties is not possible – early pick-up is strongly recommended.

Pure Festival Feeling

The aftershow concert adds a vibrant new dimension to the Imaging World festival program, which runs under the motto “Create. Explore. Have Fun.” For three days, visitors can discover more than 100 leading brands, interactive playgrounds, workshops, photo walks, competitions, and inspiring talks. The concert highlight extends the festival experience beyond the exhibition halls and makes Imaging World 2025 a true celebration of creativity.
